Education

Johns Hopkins University — *Baltimore, MD*
PH.D. PARTICLE PHYSICS — *Sept. 2016 - Oct. 2021*

Rutgers University — *New Brunswick, NJ*
B.S. PHYSICS, MINOR MATHEMATICS — *Sept. 2012 - May 2016*
GPA: 3.9, Summa Cum Laude, Honors Scholar, Phi Beta Kappa, Presidential Scholar

Research Experience

CMS Collaboration

CMS ANALYSIS LEAD (ARXIV:2104.12853) — *Sep. 2016 - Present*

- Wrote and maintained python-based analysis workflow and accompanying analysis documentation.
- Developed novel 2D background estimation technique (2D Alphabet).
- Improved current world best limit on the mass of an excited bottom quark by a factor of two
- Analysis selected as a long-exercise for CMS Data Analysis Schools (below).

STATISTICS CONTACT - B2G PHYSICS ANALYSIS GROUP — *Sep. 2019 - Present*

- Review statistical models and use of software tools in the analyses produced by the group (40-60 members).
- Provide resources for group members on topics of CMS statistics software, modeling issues, and group requirements.

Projects

2D Alphabet

CREATOR, LEAD DEVELOPER

- Framework to build two-dimensional binned likelihood model, fit the model to data, and collect results.
- Uses novel technique to measure combinatorial backgrounds from data while simultaneously fitting other backgrounds and extracting the signal.
- Recently refactored to allow more complex model building, unit testing, CI/CD, and auto-documentation.

TIMBER

CREATOR, LEAD DEVELOPER

- Library of python and C++ tools that automate CMS data processing algorithms.
- Interfaces with ROOT's RDataFrame to reduce processing times from the order of days to hours.
- Provides 20x increase in processing speed to calculate the time-intensive jet energy corrections.

Teaching and Outreach

Long Exercise Facilitator — *CERN, Fermilab*
CMS DATA ANALYSIS SCHOOL — *Sep. 2020, Jan. 2021*

- Provided python code to students, presented on statistics concepts, and answered student questions.

Teaching Assistant — *Baltimore, MD*
JOHNS HOPKINS UNIVERSITY — *Sep. 2016 - Current*

- TA for freshman physics major course since Fall 2017.

Physics Outreach with Virtual Reality — *Baltimore, MD*
JOHNS HOPKINS UNIVERSITY — *Spring 2018, 2019*

- Provided personal hardware (PC + HTC Vive) to run a virtual reality exhibit at the annual JHU Physics Fair.

Skills

Experienced Python, Unix/Linux, Git, Pytest, Doxygen/Sphinx, CERN's ROOT, batch computing, LaTeX
Familiar C++, SQL, HTML, SCSS
Non-technical Oral and written communication for technical and non-technical audiences, project and group leadership
